

# PrepPro ELW

LEED Every Day with ELW

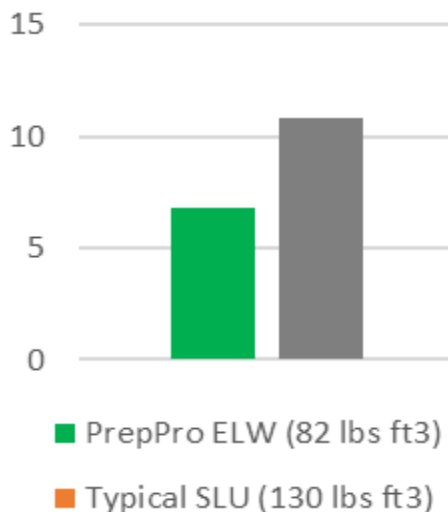

- **Reduce Structural Dead Loads**
- **Demonstrate Sustainability Leadership**
- **Work Lighter with the same yield**

Setting the new standard for sustainability, PrepPro Every Day Light Weight (ELW) is formulated to exceed finished flooring requirements while minimizing the environmental footprint. Utilizing post consumer recycled content PrepPro ELW delivers a 35% weight reduction of the slu footprint all while providing a strong smooth surface with strengths exceeding the 3500 psi requirement of flooring finishes!

PrepPro ELW's sustainability leadership extends well beyond recycled content and reduced crystalline silica by offering the design and engineering community greater flexibility with adaptive reuse. With less weight to move, reduced surface preparation and fast dry, PrepPro ELW provides the installer a lighter work load with better outcomes - every day!

Weight per ft<sup>2</sup> at 1" depth

## Suitable Substrates

- Concrete
- Lightweight Concrete
- Exterior Grade Wood (plywood/OSB)
- Existing Ceramic Tile\Cement Terrazzo
- Gypsum-based underlayment
- Cutback adhesive residue

## Suitable Flooring Finishes

- Carpet
- Wood and parquet flooring
- Luxury Vinyl Tile/Planks (LVT/LVP)
- Vinyl composition flooring (VCT)
- Sheet vinyl/rubber flooring Laminated flooring
- Ceramic, mosaic, quarry or cement body tile
- Impervious porcelain and glass tile
