

GET STRENGTH AND SPEED TOGETHER WITH PREPRO FAST TRACK

Ready for floor covering as early as 4 hours after placement

FloorPrep.com's PrepPro FT sets the standard for speedy sets in the self-leveling underlayment market; formulated PrepPro Fast Track (FT) features low-surface prep, easy as "Clean, Prime, Pour." PrepPro FT delivers >2,000 psi compressive strength after 24 hours, and >5,000 psi after 28 days - giving FT an outstanding combination of speed and strength. FT is suitable for over finished floors such as vinyl, LVT, carpet, engineered wood, ceramic tile and more - allwhile preserving the superior finish installers come to expect in today's fast-track construction environment!

PrepPro FT offers installers more than speed, FT also provides reduced surface prep compared to other lightweight underlayments and ensures a perfect finished floor. The combination of reduced weight with enhanced performance guarantees the installer a sustainable underlayment, with great finish and better weight loads - every day!
